Post Caps made on the 1/4"

Measuring Posts

Post Cap Measuring

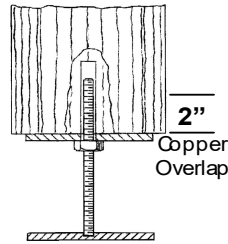

Measure the largest diameter of ALL posts and then decide to either round UP or DOWN to the nearest 1/4" increment of your post cap size. It is your choice, but if rounding down for a snug fit, you may need to remove a small amount of material from the top outside edge of your post to achieve a nice fit. On those irregular shaped posts, just give us a call for tips on sizing.

Deck Post

Jack-Wrap Measuring

Simply measure the post's diameter or circumference, we add several inches to that measurement for a sufficient overlap around the post. Then to measure for the height of your copper Jack-Wrap, add an additional 2" to your measurement from ground/floor to bottom of log, so the copper can overlap onto the log end, for attaching to the post, with the brass screws we provide for you with your Jack Wraps.

2" Copper Overlap

General Notes

- All Copper is provided in the natural state & will develop a beautiful patina over time. The Copper does go through a darkening and uneven color stage in the process.
- Minor mars, imperfections and/or color variations are characteristics of Copper & virtually disappear as Copper ages & develops its patina.
- Due to the custom nature of our products, Nortek is NOT responsible for improper measurements provided to us.
- All Copper products are handmade to order and will ship in approximately 4-6 weeks.
- All sales are final on custom orders.
- The Levelers are usually in stock and ship out within 1-2 weeks

Return Policy

* NO RETURNS * Due to the custom nature of our product line -There are no returns excepted. Please do measure twice and feel free to contact us in the measuring process. Measure twice and we will cut the copper once.

Nortek Copperworks stands behind our product's quality & workmanship. NORTEK COPPERWORKS IS NOT RESPONSIBLE FOR IMPROPER MEASUREMENTS PROVIDED TO US.
