

## 2016 Price Schedule

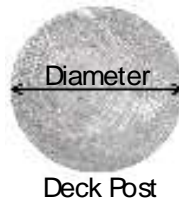

Custom sizes available  
Post Caps made on the 1/4"

### Measuring Posts

#### Post Cap Measuring

◆ Measure the largest diameter of ALL posts and then decide to either Round UP or round DOWN to the nearest 1/4" increment for your post cap size. It is your choice, but if rounding down for a snug fit, you may need to remove a small amount of material from the top outside edge of your post, to achieve the nice fit.

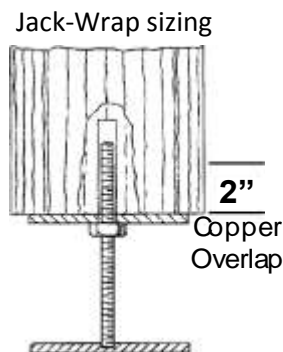

On those irregular shaped posts, just give us a call for tips on sizing.

Deck Post

#### Jack-Wrap Measuring

◆ Simply measure the post's diameter or circumference, we add several inches to that measurement for a sufficient overlap around the post. To measure for the height of the copper Jack-Wrap, allow an additional 2" to your measurement, so the copper can overlap onto the log end for attaching to the post, with the brass screws, we provide you.

#### General Notes:

◆ All Copper is provided in the natural state and will develop a beautiful patina over time. The Copper does go through a darkening uneven color stage, in it's patina process.

◆ Minor mars, imperfections and/or color variations are characteristics of Copper and virtually disappear as copper ages & develops it's patina.

◆ Due to the custom nature of our products, Nortek is NOT responsible for improper measurements provided to us.

◆ All Copper products are handmade to order and will ship in approximately 2-4 weeks.

◆ The Levelers are in stock and usually ship within 24-48 hours.

◆ All sales are final on custom orders, so please be sure to measure Twice, before ordering.
